EDUCATION

Faculty of Computer Science and Engineering, Ss. Cyril and Methodius Skopje, North Macedonia
Bachelor of Science in Computer Science and Engineering May 2026
GPA: 3.5 / 4.00

TECHNICAL SKILLS

SQL | Python* | R | Advanced Excel | Adobe Suite | Tableau | Power BI | Oracle | Java | SalesForce | Access

PROGRAMMING LANGUAGES Python (NumPy, Pandas, Scikit-Learn, TensorFlow), Java, JavaScript, C#, C++, Flutter, React

MACHINE LEARNING & AI

Model training, evaluation and optimization
Feature engineering, data preprocessing, and exploratory data analysis
Deep Learning (CNNs, RNNs, Transformers)
Generative AI Concepts (LLMs, fine-tuning, prompt engineering)

DATABASES

MySQL, PostgreSQL

TOOLS & FRAMEWORKS

TensorFlow, Keras, Scikit-Learn, PyTorch, Pandas, NumPy, Matplotlib, Seaborn

PROJECTS

Fitness tracking app Faculty of Computer Science and Engineering
Mobile app using Flutter October 2024 – January 2025

- Developed a cross-platform mobile app using Flutter that included both front-end and back-end functionalities. Implemented state management, user authentication, and integration with RESTful web services, location, and camera features. Designed custom UI components and ensured smooth navigation across multiple screens. Focused on efficient data handling, innovation, and clear project documentation.

Food Delivery Web Application Faculty of Computer Science and Engineering
Full-stack web application for managing food delivery orders April 2025 – June 2025

- Built the frontend using React with modular components, hooks, and context for state management.
- Implemented backend services in Spring Boot with layered architecture (controller, service, repository) and secure authentication.
- Connected the app to a SQL database for persistent storage of users, dishes, and orders.
- Integrated RESTful communication between frontend and backend using Axios.
- Applied best practices for data handling, UI responsiveness, and component reusability

AI-Powered Resume Parser Individual Project
Full-stack AI-driven web application for automated resume parsing November 2025

- Implemented an end-to-end AI-powered pipeline for resume parsing using LLM-based NLP.
- Integrated Google Gemini API with prompt engineering to extract structured candidate information.
- Designed scalable backend services and ML-ready data contracts (JSON schemas).
- Built a modular full-stack system using Spring Boot and React, enabling future model integration.

Diabetes Risk & Glucose Prediction System | Individual Machine Learning Project
January 2026

- Built an end-to-end ML pipeline to predict missing glucose values and classify diabetes outcomes.
- Applied Active Learning with NGBoost, using uncertainty-based sampling to iteratively improve regression performance.
- Trained a TabNet deep learning model on tabular data and extracted feature importances for model interpretability.
- Handled data preprocessing, invalid-value imputation, evaluation (R^2) and visualization using Python, Pandas, PyTorch and scikit-learn.

Github: https://github.com/elenaPoposkaa/diabetes-ml-project

Retrieval Assistant (Semantic Search NLP System) | Individual Machine Learning Project
January 2026

- Built an end-to-end semantic search assistant for multilingual customer support, using sentence embeddings and cosine similarity.
- Precomputed multilingual embeddings with sentence-transformers to enable fast top-k retrieval.
- Developed a FastAPI backend with a real-time /ask endpoint for querying the knowledge base.
- Implemented confidence scoring and scalable indexing for production-style deployment.

Github: https://github.com/elenaPoposkaa/faq-retrieval-assistant

INTERNSHIP

Software Engineer Intern | Ministry of Internal Affairs of North Macedonia, Skopje
March 2026 – June 2026

- Contributed to the development and enhancement of software solutions in collaboration with experienced engineers across the full software development lifecycle (SDLC).
- Wrote and optimized SQL queries for database tasks and performed data analysis to support team goal.
- Performed software testing to identify defects and verify functionality, improving the reliability of system.
- Applied strong problem-solving skills to troubleshoot and resolve technical issues in an Agile team environment.

Marketing & Sales Assistant Intern, Dynamic Development Solutions (DDS), Skopje
June 2026 – September 2026

- Supported the company's website and social media content, strengthening brand visibility for an IT consulting firm.
- Assisted with client outreach and lead generation to move prospects through the sales pipeline.
- Researched markets and competitors to identify opportunities and shape outreach strategy.
- Translated technical solutions into clear value for non-technical clients.

LEADERSHIP

Go Green - Association for Sustainability and Environmental Protection Skopje, North Macedonia
Project Coordinator May 2021- June 2024

- Led organizational initiatives focused on sustainable development and environmental awareness across local communities.
- Coordinated eco-campaigns, educational workshops, and volunteer programs promoting recycling and renewable energy.
- Managed a team of volunteers and collaborated with local institutions to implement community-based sustainability projects.
- Recruited and mentored new members, increasing engagement and participation in environmental activities by over 30%.

ODAS – Organization for Dialogue and Affirmation of High School and University Students

Youth Project Member / Coordinator

- Coordinated youth-led projects promoting dialogue, leadership, and civic engagement among students.
- Organized workshops, campaigns, and community events focused on education and student rights.
- Collaborated with schools, media, and NGOs to strengthen student participation and advocacy.
- Managed communication activities, including content creation for social media and blog platforms.

Contributed to building a nationwide network of motivated and responsible young leaders.

ADDITIONAL INFORMATION

Languages: Fluent in Macedonian and English,
Interests: Hiking, Skiing, Running, Painting, Traveling
